

# LAPYA CLICK

Originally one of Roka's most beloved recycling units, Lapya has been upgraded to peak sustainability and innovation. This enhanced version boasts new features aimed at revolutionizing recycling practices. Waste bags are placed and emptied from the top, providing added convenience and ease of use.

Lapya Click has been upgraded with its modular feature. It features an easy-to-use 'click system' for assembly. Customers receive a flat package, allowing them to effortlessly assemble the body and frames themselves. This modular product design enhances ease of assembly and installation.

# MAGNETS

Our bins offer the convenience of magnetic connections, allowing for easy setup and providing flexibility for various waste streams as needed. This feature saves time and enhances efficiency in waste management. The specially designed and innovative bag fixing system on the body makes attaching waste bags to the unit easier, saving operational time and preventing the bag from slipping off the bucket when waste is thrown away.

Lapya has a cradle-to-cradle score of 92, indicating its high level of sustainability. It is crafted using 88% recycled steel and is entirely made from 100% recyclable materials. This makes Lapya an eco-friendly solution that not only prioritizes environmental responsibility but also ensures a closed-loop recycling system.
